SUMMARY

Informatics Management student at Politeknik Negeri Padang with hands-on experience in web development (Laravel, .NET) and UI/UX design in Figma. Led a development team on a student admissions system and co-designed a 10-screen academic mobile app prototype. Brings solid UI/UX and teamwork skills to build practical, user-centered digital solutions, and is eager to apply AI to real-world problems.

EDUCATION

Politeknik Negeri Padang 2024 – Present
D3 Informatics Management

SMA Negeri 1 Sutera 2021 – 2024
Natural Sciences

PROJECT

Student Academic Mobile App – UI/UX Prototype (UAS Figma, Group 7)
UI/UX Design (group project) | Tool: Figma

- Designed a mobile app concept that gives students one place for attendance, course materials, assignments, and grades.
- Created 10 screens, including a tap-to-attend check-in with live clock and a dashboard summarizing attendance, tasks, and GPA.

Student Admissions System (PPDB) – Web Application
Team Leader, Backend Developer, UI/UX Designer | PHP, Laravel, MySQL, Tailwind CSS, JavaScript, Figma

- Led the development team for a school enrollment portal with online document validation and automatic selection announcements.
- Built the backend and designed the UI/UX, including a multi-step registration form and document upload.
- Built an admin dashboard for document verification and grade-based selection, plus instant status checks for students.

Student Organization Management System – Web Application
Developer, UI Designer, Database & Testing

- Developed a web system for managing student organization activities on campus, as part of a team.
- Designed the UI in Photoshop and Illustrator, managed the database, and performed system testing.

HIMA TI Website – Web Application
PHP, MySQL, HTML5, CSS3, Bootstrap, JavaScript

- Official website of the Informatics student association (Dhirigika Cabinet) for events, department information, and division profiles.
- Built a responsive layout and division showcase components, and managed the integration of event agenda content.

Mini Library Information System – Desktop Application
C#, .NET, Windows Forms, OOP

- Desktop application for member data, book lending and returns, and the library catalog.
- Designed intuitive desktop forms and built the relational data model.

Anugerah Motor Logo and Visual Identity – Graphic Design
Adobe Illustrator

- Logo and visual identity with an automotive feel for a repair shop and spare parts business, built as precise vector artwork.
- Researched the visual concept, drew symmetrical gear and wrench elements, and created custom typography.

HACKATHON

KMIPN VIII 2026 Hackathon – Team Martabak Nyasar ke Mesir, SIVOKA 2026
Team Member | Participant (proposal stage)

SKILLS

Hard Skills : PHP, JavaScript, C#, HTML, CSS, MySQL, SQL Server, Laravel, .NET (MVC, Web API), Windows Forms, REST API, Bootstrap, Tailwind CSS
Design & Tools : Figma, Photoshop, Illustrator, Git & GitHub, Visual Studio Code
Cloud : Cloud Computing and Cloud Service basics (Huawei HCIA)
Soft Skills : Team Leadership, Collaboration, Project Delivery

CERTIFICATE

HCIA-Cloud Service V3.5 (Certificate of Completion) – Huawei ICT Academy 2026
HCIA-Cloud Computing V5.5 (Certificate of Completion) – Huawei ICT Academy 2026
